Authorization Approved!

Welcome code name 114112, the following information is classified Top Secret Priority One, any leak of the following information will result in severe disciplinary action and/or removal from the Allied Space Supervisors, among other potential punishments. Do you understand?

Good. The following classified information is about the Luna class recon ship The Expel, which ran into a violent life form while investigating the unnamed planet known currently by its code name RA93. On board The Expel were five crew members, all female, from the age range 18 to 22, their dossiers are below and are representative of them BEFORE the incident occurred.

CHAMBERS, KELLY

Rank: Ship Captain.

Age: 22.

Combat Experience: Substantial.

Personality Traits: Confident, Strong, Self-Assured, Leader.

Weaknesses: Too Compassionate, Sometimes Fails To Follow Procedure.

Physical Description: American, White, Brown Hair, Brown Eyes, Bra Size B-Cup, Flat Strong Core, Firm Perky Ass. Height: 5'8. Weight 105.

CHEKOV, OLGA.

Rank: N/A, Scientist.

Age: 21.

Combat Experience: None.

Personality Traits: Confident, Intelligent, Easy to Control, Loner.

Weaknesses: Arrogant, Coward, Untrustworthy Without Proper Incentive.

Physical Description: Russian, White (Heavily Tanned), Bleach Blonde Hair (Artificial, Real Color Brown), Bra Size E-Cup (Artificial, Real Size B-Cup), Thin (Artificial Used to Be Overweight Before Liposuction), Large Round Bubble Butt (Semi-Artifical, Subject Used Body Fat From Liposuction to Sculpt Her Cheeks, Before They Were Much Smaller) Height: 5'1. Weight 100.

VANG, ELLE

Rank: 1st Officer.

Age: 20.

Combat Experience: Substantial

Personality Traits: Bold, Self-Assured, Fearless, Loyal.

Weaknesses: Arrogant, Uncompromising.

Physical Description: Vietnamese, Brown, Black Hair, Bra Size C-Cup, Strong Core, Fat Round Heart-Shaped Ass. Height 5'2. Weight 105.

PEREZ, LEA

Rank: Private First Class.

Age: 19.

Combat Experience: None, High Ranks in Training.

Personality Traits: Curious, Jokester, Friendly, Kind.

Weaknesses: Lack of Discipline, Simple.

Physical Description: Mexican-American, Brown, Black Hair, Bra Size B-Cup, Little Bit of Belly, Plump and Firm Bottom. Height 5'4. Weight 105.

CHOU, HALEY

Rank: Corporal

Age: 18.

Combat Experience: Little.

Personality Traits: Obedient, Brave, Conventional, Practical.

Physical Description: Chinese-Irish, Pale White, Bright Red Hair, Bra Size C-Cup, Waif-Thin Core, Tiny But Cute Rump. Height 5'0 Weight 90.

Now Follows The Story Of Their Arrival and Subsequent Attack By A Hostile Alien Life Force That Uses The Human Body As A Breeding Chamber. Would You Like To Learn More? Great! Story Commencing...

"So tell me exactly why we are going out of our way to investigate RA93, some planet out in the middle of nowhere?" Lea asked leaning against the small kitchen's counter while twirling her long black hair and smacking her gum loudly as the other girls sat around eating dinner as usual.

"Do you let all your subordinates talk to you like that Captain Chambers, or does discipline mean nothing to you?" Olga remarked, sitting at her separate (and high end) desk as usual, reading all the information she could on RA93 on her personal computer, whereas everyone else had to share a single computer on rotation.

"What do you know about discipline Miss Scientist? You're not even apart of this crew as far as I'm concerned." Lea snapped back, crossing her arms and flipping her hair out of her eyes as she tried to give off as much attitude as possible.

"Do I need to remind you that I've read not only your file, but the files of everyone on this ship? I know about your problem taking orders, and I also know about your lack of intellectual abilities as well." Olga scoffed, covering her face as she laughed at the now red-faced Lea, who was about ready to knock her out before Kelly, the Captain, finally had enough and stepped in.

"Calm down Soldier, you don't want to prove her right by not following my orders now do you?" Kelly asked looking the upset Lea in the eyes, calming the mad girl down enough that she returned to her room.

"About time you stepped in, she was really out of control, some leader you are." Olga rudely remarked, not able to bothered with such things as thanks or looking away from her computer while talking.

"Don't talk to the captain like that!" Elle exclaimed getting to her, "She's saved my life more than once, and she is an excellent leader."

"Please Elle, I appreciate your praise but Olga is entitled to her opinions, and I think it would be best if we all work together don't you agree." Kelly said calmly before dismissing her First Officer to her quarters.

"Good Night Captain, Olga." Elle said with restrained anger, turning to leave before Olga finally looked away from her computer screen with a face wracked with rage.

"You will address me as Dr. Chekov, I'm not your friend or colleague." The excessively busty girl demanded, Elle looking to Kelly who simply nodded in agreement.

"Fine, Dr. Chekov, I'm sorry, have pleasant dreams." Elle said refusing to look Olga in the eyes before quickly marching out of the room, leaving only Kelly, Olga, and Haley who has been quietly listening to music, oblivious of all the action until she saw Elle marching out of the room.

"Hey what's wrong?" She asked Elle as she marched past.

"Nothing, I just want to get away from the all knowing Dr. Chekov."

"Oh okay, that makes sense, I hate her too."

"I can hear you!!!" Olga shouted, Haley just shrugging before putting her headphones back on.

"Captain she just disrespected me, do something." Olga demanded, Kelly simply chuckling before turning to leave.

"If you're entitled to your opinions than so is she."

"Whatever, leave me alone so I can do something that is actually important, unlike you losers who go around bashing things in the head." Olga said semi-under her breath, turning away before Kelly cleared her throat to get her attention.

"You know, Dr. Chekov, as Captain I got to see your files as well, and I know that you are about as artificial as my respect for your enlightening opinions."

Stunned and flustered, Olga simply sat there before Kelly politely told her goodnight and left, leaving just Haley and Olga alone. Haley couldn't help but snicker, not bothering to hide it to the artificially blonde (among other things) Russian woman's face. With no one to yell at, Olga went back to her work, while

the adorable half white half Asian Haley got up to take a shower and go to bed. Though no one would know it at the time, there arrival at RA93 in the morning would drastically change their life's. But as far as they were concerned, it was just another mission to examine the possibility of life on a planet that is suppose to be dead, but for some reason was showing low levels of primitive life.

Landing on the seemingly lifeless planet, Captain Chambers was stunned when the readings showed that there was not only enough oxygen to support life but that they wouldn't even need helmets as the planet's pressure was similar to that of Earth's. Looking out the window, it looked as if they had landed in the Amazon forest.

"Fascinating." Olga said with a smile as she took down notes while stepping out of the small ship behind the other four.

"How is this possible? Why did the readings say this was a barren planet?" Lea asked Kelly who was equally surprised.

"I don't know why, but be careful, there must have been a reason." Kelly advised before telling the girls to split up and investigate the surrounding

area, Olga staying with the captain as she continued to log down notes.

"Do you know what this means? Life an another planet, we are going to be rich!" Olga squealed in her high pitch (and annoying laugh), Kelly doing her best not to cringe before speaking.

"Perhaps, but don't you find it strange that there is all this plant life yet no animals or insects."

"Well maybe they are just some where else on the planet, maybe we scared them off, who knows, either way this is an important discovery!"

As Olga and Kelly continued searching the other three girls were investigating, the distance between them increasing. While Elle and Haley searched and took samples of the plant life, the ever curious Lea was doing the same, chewing her gum loudly and blowing bubbles until a sudden rustling and the flicker of a shadow caught her attention. Too excited to radio in what might be wild life, Lea ran over to the rock she thought she saw the shadow dive behind.

Slowly peaking over, Lea briefly saw a creature with four spidery legs, a long tail, and no distinctive facial marking. It looked to be about half a foot long and three inches wide, but before Lea could radio in the creature launched itself onto Lea's face, wrapping it's long legs around her head before shoving its foot long "tail" down her throat, knocking the girl out instantly. Now free to do as it pleased, the creature started pumping thick, gooey slime down the sleeping Latino's slim throat, slowly filling her stomach until she looked to be a few months pregnant before laying a golf ball sized egg in her. Done with it's deed, the small creature ran off into the woods, dying shortly after.

The whole ordeal only took about five minutes, and when Lea woke up she had forgot what happened thanks to the special slime she had been force feed. As soon as she stood up a pain in her gut grabbed her attention. Looking down, she could swear she had just gained a few pounds, though she couldn't tell for sure since she had been eating a lot lately. Letting out a groan, Lea realized she urgently needed to use the bathroom and pulled her pants down before squatting, the girl violently emptying her bowels for

what felt like an eternity before she finally stopped, cleaning herself up before heading back to the ship.

"That had to be the biggest shit of my life." She thought to herself before finding the rest of her crew mates there already.

"Ready to go yet Lea?" Olga asked impatiently, tapping her foot on the ground as Lea pushed past her.

"Sorry had to take a dump, is that okay with you Dr. Chekov?"

"You enlisted are all so vulgar, except for you of course Captain."

"Your praise means the world to me Dr. Chekov, but I believe it is time to go." Kelly said as the girls headed back in the ship for the three day trip back to the nearest base to inform them of their discovery.

As the day passed Lea found herself rather uncomfortable, her belly groaning as if she was constipated, but every time she tried to go to the bathroom she couldn't even get a fart out, and if that wasn't enough she could swear her belly was getting bigger too. Not wanting to cause attention over something she figured would pass, she said nothing and went about her day until dinner, Lea coming in last to see Olga was already knocking heads with Haley and Elle.

"What do you mean you don't think it's strange that there is no animal or insect life on the planet?" Elle asked Olga who was once again at her computer typing away.

"Yeah there wasn't even any noises or sounds the whole time we were there." Haley added as the girls all sat around and ate, except for Lea who was pushing her food from one side of the plate to another with her fork.

"Listen I am the scientist, you are soldiers, what do you care anyway?" Olga rudely responded without even looking up.

"Well all I am saying is-" Elle started before Lea let out a moan as her belly rumbled loudly, "You okay Lea?"

"Yeah I'm fine, I'm just not hungry I guess."

"Okay well keep it down k?" Elle said giving her a playful punch before turning back to Olga, "So what I was saying was-"

"OOOOoohhhh." Lea once again moaned as her tummy was grumbling virtually non-stop.

"Are you sure you're okay?" Haley asked concerned, Lea trying to play it off as she stood to leave, only to double over in pain as her she suddenly felt an overwhelming need to defecate.

"OOOHhhhh What's happening to me?" Lea moaned as she fell over onto the dinner table, sticking her plump, round ass up in the air before letting out a long and painfully dry fart, her tight jeans hugging the curves of her hips and showing the crack of her ass clearly as her legs shook and struggled to keep her non-stop farting bottom held high.

"Haley, take Olga to medical to get things ready, I will meet you there." Kelly ordered, jumping to action.

"Yes Captain, come on Dr. Chekov." Haley said dragging the stunned girl with her.

"Fuck it hurts so much!" Lea cried as she was now being forced to bare down on herself with all her might, her backdoor letting loose numerous dry farts as Haley tried her best to support the girl.

"It's okay Lea, just relax." Elle said softly as Lea continued to grunt and sob in agony.

"Calm down, where is the pain exactly Lea?" Kelly asked the mumbling grunting teenager as she clenched her belly tightly.

"In my ass! It feels like something huge is in my ass!" Lea wailed with her forehead pressed against the table as a massive rumbling in her belly was quickly followed by Lea's knees buckling in as she let out a gigantic slime filled fart, the girl crying in embarrassment as she couldn't control her

sphincter as slime bubbled and oozed out her trembling ass and ran down the inside of her pants, the torrent of slime refusing to slow down as it started to puddle under the girl's shoes.

"Pull her pants down now!" Kelly ordered Elle, who pulled the girl's soaked jeans and panties down to her knees without unbuckling her belt, forcing Lea to keep her knees close together as her untanned and soft ass was fully exposed before Haley gasped loudly in shock at what she saw.

"Why are you gasping like that?" Lea asked weakly as she felt Haley's hands spread her plush cheeks.

"Oh my god." Elle exclaimed stunned, unable to believe what she was seeing.

"What? What is it?" Lea asked crying as she felt something in her gut lower substantially.

"Yes Corporal, what do you see?" Kelly asked before walking over to see for herself, taking aback by what she saw before speaking, "Lea, why does your anus look like this?"

"Like what? What do you see?" Lea asked panicked, Kelly taking a picture with her multi-purpose communicator and showing it to the constipated girl.

"No, no, no that can't be my asshole it just can't." Lea bawled in shock as the picture showed her virgin rosebud to be massively swollen and puffy, her normally dime sized hole now the size of a half dollar.

The unfortunate girl's anus looked like it was pumped out and it was dripping with slime. However it was about to be much worse as Lea felt a huge pressure inside her anal cavity, forcing the girl to bare down and release another massively wet, slimy fart, blasting the poorly placed girl's behind her as she suddenly felt something massive push up against her dilated anus.

"Something's coming! Something's coming out of my ass!" Lea cried as her belly let out the loudest groan yet, Elle and Kelly wisely stepping back as

Lea reached forward and gripped the edges of the table with both hands, squeezing until her knuckles went white, her long legs trembling as her engorged anus started bulging even more, the pressure building against it so great that Lea though she was going to explode, the flexing, grunting, shivering girl grinding her teeth before letting out an ear shattering scream as she released a gargantuan slime filled fart for a good ten seconds before being interrupted by

a violent, anus destroying *Pop* as her rosebud was abruptly torn open as a fully grown creature, same as the one that attacked her, blasted out of her anal cavity, pulling her rectum inside out before it hit the slime covered wall with a wet splat.

http://www.hentai-foundry.com/pictures/user/nightglare/344260/Assburster
Kelly and Elle were too distracted by Lea's wailing to notice that the creature had disappeared into a vent. Looking back at Lea, the two saw that the girl had finally collapsed on the table, her buckled legs no longer holding her up as they quivered disturbingly, blood and slime running down from her blown out and grossly prolapsed pooper as the poor girl mumbled incoherently and sobbed in agony. After a few seconds Lea's ruined anus reluctantly returned back to her body as a bruised, ripped, torn, gapping, and swollen hole, her broken anal ring unable to even wink as it was gapping an inch wide. Shining a flashlight inside, Kelly and Elle saw that Lea's insides were horribly stretched and coated with thick slime, the two able to see a good half foot inside the ruined cavity that was now Lea's rectum.

"Are you okay Lea, can you speak?" Kelly asked the girl, only to find her to be in too much pain to respond. After pulling her pants back up, Kelly and Elle carried the now passed out girl to medical, where they met a very worried Olga and Haley who bombarded them with questions.

"What happened to her? What was that scream? Is she dead?"

"Please! Please calm down." Kelly instructed before pacing the room to think of a plan, stopping after a minute or two. "So here is the plan. Olga and I shall remain here with Lea and try to help her the best we can, Elle

and Haley will split up and find this creature, don't kill it unless you have too."

"What creature, what are you talking about?" Haley asked nervously before Kelly hushed her.

"It came out of Lea's rectum, she must have been somehow impregnated on the planet."

"Wait shouldn't we check to see if we have it in us? I mean I don't want that to happen to me!" Olga said worried before Kelly reassured her.

"We will, I will check You and me for anything strange while they look, but if any of us were also impregnated wouldn't we have known by now? She was probably attacked when she went to that bathroom, remember how she was late."

"Well why wouldn't she say anything, I mean if this thing can get her without knowing then maybe-"

"Silence please!" Kelly ordered, "We WILL figure it all out AFTER we capture the creature on this ship."

"Okay, but remember not to kill it, I can make a fortune with a living specimen from another world." Olga told everyone before Elle angrily snapped back.

"After all that you are still worrying about making money. I hope whatever it is it gets you good."

"ENOUGH!" Kelly yelled irritated, "Go and do as I said Elle and Haley, report anything weird, and try not to kill it but don't take any unneeded chances, set your laser pistol to maximum stun."

"Yes Captain!" Haley and Elle said in unison before running off to search.

"Now, let's see if any of us are infected." Kelly said as she picked up an ultrasound wand.

"Are you sure? Are you sure there is nothing in me?"

"Yes, I've already checked twice, we are both clean."

"Oh thank god!" Olga sighed in relief, happy to know that she doesn't have whatever that creature was inside her.

"Indeed we are lucky, but we must now make it our priority that whatever that was doesn't get any more of us." Kelly said firmly.

"I agree Captain, but what exactly happened out there?"

"Lea, as you saw, had terrible pains in her gut, followed by extreme pain in her rectum. After releasing a huge quantity of slime Lea screamed and the creature came out, well let me show you how." Kelly said as she flipped the still unconscious Lea onto her tummy before pulling her pants and undies down. Olga gagged in disgust as Lea's anus was still extremely swollen and agape, slime still easily visible inside the girl's wrecked tunnel.

"Did it come out of her ass?" Olga asked as she covered her face before Kelly pulled the girl's pants back up.

"More like exploded out, her rectum was literally pulled out of her body, I can't imagine the pain she will feel when she wakens."

"And what was that slime in her ass?"

"I don't know, but I am running a test on a sample of it now, it should be done anytime now, until then we need to be careful, who knows what that thing can do or what it wants to do."

"I agree Captain, I will tell you all I can once the test results come back."

"Thank you Doctor, that will be helpful."

As Kelly and Olga waited for the analysis to come back, Elle and Haley were searching the ship, Elle exploring the vents as Haley searched the floors.

"Haley come in." Elle radioed as Haley quickly answered back.

"Yes Commander?"

"There is a trail of slime in here, I would follow it but it goes into an area to tight for me, I am going to get out and explore the Starboard side of the ship, you let me know if you see anything." Elle said with

authority, Haley nervously radioing back a "Yes ma'am" as she continued her search with laser pistol in hand. Entering the food storage area, Haley heard her bully grumble hungrily as she was unable to finish her meal due to the uninvited guest crashing dinner. She knew that snacking isn't exactly the best choice, considering the situation, but she was too hungry to focus. Besides, it won't take long. Going through one of the open boxes, the ultra thin, pale, and freckled redhead looked at a bag of chips.

"200 calories? Ugh why is everything here so unhealthy?" She said with annoyance as she throw the bag back down and turned around, the cute Chinese-Irish girl's green eyes going wide when she spotted her favorite treat, a box of organic all natural low calorie sugar free rice cakes. Running over excited, she put her laser pistol down and picked one of the snacks up, the girl shoveling it town her throat as she picked up another one.

"Mmm, these are so good!" She said to herself as she debated eating a third one, her hunger making her stuff her mouth, now full of the dry treats. Still chewing the dry snack, Haley picked up her gun but quickly it dropped back down as it was now suddenly soaking wet. Bending down to take a look, she saw that it was coated in clear slime.

"What the hell?" She thought to herself as she picked it up and wiped some of the slime off on her form fitting white yoga pants, the girl looking back at the counter to see that there was a puddle of slime.

Looking up, Haley saw to her horror that the creature was there, its body now swollen up like a tick, its half foot long body now eight inches wide. Haley tried to aim but the creature was too quick and jumped down on the girl, who was barely able to protect her face, throwing the alien across the room, but accidently throwing her slick laser gun with it.

Unarmed and unable to speak due to the dry snack she was still trying to chew, Haley sprinted for her weapon, but the creature used its tail to shoot a load of slime on the ground, making the girl slip and fall down face first, her cute little rump unprotected as her legs were sprawled out behind her, her thin legs desperately trying to get traction on the slick ground before she was pushed down onto her full breasts, her tight tank top forming a deep cleavage as the creature jumped on her back, bounding her arms to her sides with its long legs, making it impossible for her to radio in for help.

Finally swallowing her poor choice of a snack, Haley screamed for help, but she was too far for anyone on the noisy ship to hear her. Looking back, her eyes went wide in fear as she saw the bloated creature was wrapped around her tight, its foot long, one inch wide tail whipping around wildly before it curved towards her firm bottom. Haley begged for mercy as the creature pulled its tail farther and farther back as if winding a spring, taking careful aim at Haley's adorable little buns before it suddenly sprung down towards her unsuspecting and virgin derriere, sliding in between her soft, trembling cheeks to penetrate the back of her thin yoga pants, nailing her right in her unbleached pucker with such force that her tear-filled eyes went cross-eyed as the creature's tail quickly and painfully worked it's way a half foot up her warm, constricted passage, the teen bawling in misery at the unwanted alien's anal probe.

"Ohhh fuck! Get out of my butt now please!" She begged as she struggled to get up, only to keep slipping back down on the slime coated floor before looking back to see the creature's tail bulging with huge baseball sized lumps.

"No please! Not in my ass! Have mercy!" Haley cried as the first massive egg pushed up against her tight rosebud, giving the girl no time to adjust as it didn't even bother to slow down, making the cute girl's

freckled face wince as it ripped the girl's exceptionally tight anus in several places, her anal ring stretched thin as the egg forced it's way into her rectum. Haley kicked in agony and wailed at the top of her lungs as the first egg quickly broke down her backdoor and traveled a whole half foot up her clenched poop chute, wasting no time as the creature used brute force to lay the large egg in less than five seconds.

Unfortunately for Haley, whose vocal sobbing went unheard, this was merely the first egg of many, the creature eagerly depositing a whole dozen into the struggling girl's teenage bowels in less then a minute, loosening Haley's virgin anus to that of a professional porn star, ripping and tearing her a new, well you know.

Now in unbearable agony over her sodomy and subsequent suppositories, Haley assumed the worse was over only to feel a rush of cool liquid as the creature gave the little pale Asian an extra big slime enema, pumping all of the liquid inside it's swollen body until the creature had emptied itself back to original size. Now done turning Haley's perky ass into an alien egg chamber, the creature slowly pulled out of Haley's rosebud with a wet sickening pop before running off, leaving her anus sore, swollen, and deeply bruised. Looking down Haley saw she now had a massively swollen belly, the ultra thin girl now looking nine months pregnant.

"Oh why did it lay eggs in my ass?" Haley whined as stood up weakly, rubbing her distended gut before it rumbled loudly, forcing Haley to lean over and fart out a large glob of thick slime, which trickled down the back of her yoga pants through the hole exposing her stuffed, swollen pooper. Haley's ass throbbed with pain as she reached back and felt the hole that had been torn in the back of her favorite yoga pants, the destruction of them now the least of her concerns as she felt compelled again to bent over and push, slime gushing out in rapid, painful farts. With her hand on her massive belly, she called for help and started back to medical, every few steps slime squirting out from her impregnated and sore anal cavity as the eggs started to gestate inside her slime coated bowels.

Stumbling into medical and shocking Olga and Kelly, Haley's distended belly pulls her forward while the intense pressure of having an ass full of eggs makes her wail whenever an unexpected shift in her slime coated bowels forces the sticky substance out of her sore pucker in agonizingly painful farts, the goo often bubbling before popping and running down the inside and outside of her tight yoga pants. Helping her, Kelly orders the impregnated teen to get up onto a medical table, the young lady getting on her knees and sitting on her feet as she reaches out in front of herself to arch her body, her juicy little butt stuck high in the air, making it look like she is

praying as her bulging rosebud is easily visible through the hole in the back of her white yoga pants.

"How did this happen Haley?" Kelly demands as the Captain quickly washes her hands before reaching for a box of latex gloves, Haley's eyes watching uneasily as Kelly snaps the gloves on, making sure to pull them on for a tight fit.

"I, I was just having a snack and when I looked up it was there, I went to shoot but it was too fast." Haley answered weakly between her panted breath as her gut continues to gurgle without end while slime leaks out of her aching and enlarged anus, her recently impregnated orifice already starting to swell in anticipation of her upcoming delivery.

"Well the good news is that while you and Elle were out looking me and the Doctor here found out more

about the slime." Kelly said before Olga cut her off.

"It is very fascinating actually. It acts like a glue, feeding the eggs until they are fully grown, but once the eggs get all the nutrients they need from the slime, the slime breaks down into a strong laxative and lubricant."

"What do you mean?" Haley asked with eyes full of fear before groaning loudly in pain as she squeezed her bowels tightly, forcing out a massive glob of slime that splattered all across the room, Haley weakly catching her breath before continuing, "Am I going to have my ass blown out like Lea did?"

"What Dr. Chekov means is that there is still time to get the eggs out." Kelly said before picking up a bottle of engine lubricant, applying it liberally to one of her hands, "The bad news is that since the slime acts like glue until the eggs are grown, and that there is no way you are passing them before hand, the only way to get them out is to physically extract them."

"Wait a minute, maybe they will come out by themselves, we don't need to be so rash." Haley said stuttering as she put two and two together, the teenager trying to get up before Kelly forced her down sternly, pushing

Haley's stretched belly hard onto the table, forcing out another loud, moist, slime filled fart as Haley whined in agony.

"Sorry but the eggs gestate too quickly, and the medical labs' bio-detector states there is a whole dozen crammed in your anal cavity; its the only way Haley." Kelly said gently as Elle finally arrived, "Ah good timing Elle, I need you to restrain Haley so I can get the eggs out."

"No wait please! Isn't there some other way?" Haley begged as Elle strapped the bloated little Asian redhead to the table before pulling her pants down to her thighs, revealing Haley's blindingly white and pale cheeks, the outline of her swimsuit easily distinguishable from the rest of Haley's pale, freckled skin.

"This might hurt a bit, try to be strong." Kelly told Haley, trying to be supportive before applying a healthy glob of engine lube to Haley's swollen orifice, the girl shuttering as the cold lube caused her sweat drenched skin to break out in goose bumps, "Sorry, we don't have any anal lube on board so this will have to do."

"Please don't! It'll hurt! Please Captain no!" Haley wailed before Kelly ordered Elle to gag the crying redhead, whose whines were muffled by her own slime coated panties when Elle shoved them down her throat. Now silenced and immobilized, Haley looked back with her wide, tear-filled, frightened green eyes, Kelly placing a hand on the girl's neck, forcing her to look forward before running her lubed hand up and down between Haley's trembling ass, thoroughly lubing her backside before pushing into her anus, Kelly shushing the crying girl whose resistance only became greater as Kelly slowly started spreading her open, Haley going wide-eyed as she wailed in agony as Kelly entered her backdoor with a sickening wet slurp, her clenched anus fighting the whole way until Kelly finally forced her hand into Haley's snug and humid anal cavity, causing the poor girl to flail helplessly against her strong bindings and scream into her panty gag as Kelly slowly started working her arm up Haley's tight tunnel.

"I'm sorry Haley, its the only way, or else you will end up like Lea, but instead of one creature you will have twelve exploding out of you." Kelly told the thrashing girl, Elle having to help keep her still despite being tied to

the table as Kelly worked inch after painful inch of her fist up Haley's slime coated bowels,

getting nearly up to the elbow before she finally felt the first egg.

"Okay I got one Haley," Kelly said as she used her free hand to pet and sooth the sobbing teenage girl, whose face was wet with tears as Kelly started pulling the large egg out, Haley moaning in unbearable pain as the egg traveled through her rectum, getting closer and closer to her exhausted anus until Kelly was right up against it, only having to pull the egg out.

"Are you ready Haley?" Kelly asked the girl, who looked back with wide, pleading eyes, shaking her head back and forth only to wince in pain and grunt deeply as Kelly pulled with all her might, and as the egg started coming out, so did Haley's clinging rectum, the teen's pooper being turned inside out before the egg finally came free, leaving Haley with a miserably prolapsed mess of an anus.

"One down." Kelly said with forced enthusiasm as Haley wailed in agony until her rectum returned back to her body, only to be quickly invaded once more by Kelly's arm as the Captain wasted no time going in to get a second, Haley continuing to struggle as Kelly did her best to pull the second out egg without causing Haley harm, but even then Haley's poop chute was turned inside out as the second egg stubbornly left Haley's intestines, Kelly having to pull the egg far away from Haley as the glue like slime left long strands connected to the inside of Haley's rectum as it tried its best to keep the egg in. As egg after egg was pulled out from Haley's body, the unfortunate girl's pooper got looser and looser, her loud, emotional bawling eventually turning into a defeated and weak cry, Haley only truly crying whenever her rectum was pulled inside out by the removal of an egg.

After the last one was extracted, Kelly having to work nearly her whole arm in to reach it, Haley was starting to fade in and out of consciousness, the agony of being sodomized, stuffed, and then unstuffed in the span of a little over an hour leaving the cute little sensitive girl traumatized and incoherent. When Elle finally removed her panties from her mouth, Haley simply mumbled before passing out, her poor anus now as destroyed and

devastated as Lea's, though at least now there will not be twelve more creatures running around on the ship.

Looking at the twelve slime coated eggs on the table, Elle, Olga, and Kelly couldn't imagine the torture of having them stuffed up their asses, but while they took a moment to catch their breath and recoup, the alien had shed it's skin multiple times as it was starting to grow larger and larger. When it was finally done growing the creature looked humanoid, it's tail now a massive penis as it swung between the creature's legs as the female alien stood up for the first time on two legs. Looking around, the creature had a swollen belly filled with dozens of large eggs and gallons of gooey slime waiting to be deposited.

What was most shocking was how the alien had taken on some human characteristics from it's original host, the alien now having light green skin, long shiny legs, full DD breasts, and a beautiful face complete with long flowing black hair. Now eager to breed, the Futa alien ran off into the shadows to look/wait for its next mate.

"OOOhhhh!" Haley panted as her devastated anus tried to wink but was too gaped and stretched to close, the petite girl's bowels still heavily coated with slime which occasionally squirted out from between her pasty cheeks in embarrassingly loud and messy farts whenever her tummy gurgled.

"Is my ass going to be okay?" She asked weakly as a large slime bubble started forming out of her loose pooper, growing larger in size with each painful contraction of her bowels, getting to the size of a bowling ball before loudly popping and splattering her backside with long strands of sticky slime, the exhausted

girl quickly passing out after words.

Now with two of their small crew of five down, and Olga a mere scientist. Kelly and Elle decide to split up to look for the creature, leaving Olga to guard the two butt busted girls, unaware that the creature that was small only an hour before was now as big as they were. Kelly decided to check the starboard side of the ship while Elle took the other, the two girls armed with their laser pistol still set to stun, their strict guidelines forbidding

deadly force unless absolutely required, after all for all they knew the creature was simply trying to reproduce.

Checking her corners and following procedure perfectly, Elle searched the ship, unaware that she was about to walk into a trap that the intelligent Futa alien had set up. Entering the cargo bay, Elle noticed a long trail of slime leading to a narrow vent, just wide enough to squeeze into. Squatting down and peaking in to investigate, Elle shined her flashlight into the dark shaft, the cute and brown Vietnamese girl seeing what looked like the creature. Thinking she had an easy pray, the proud Elle crouched down and crawled halfway into the shaft, her long black, shinny boots planted firmly on the ground as her thick thighs and fat, heart-shaped ass wiggled enticingly as the bent over girl struggled to fit into the narrow corridor. When Elle finally reached what she saw, she discovered it was merely a discarded moulting the alien had shed while growing. As Elle investigated the strange, slimy skin, she heard footsteps behind her.

"Oh Kelly, look I found it's skin, whatever it is it has grown."

"Indeed it has." The alien answered with a hiss, before using it's large, sharp, foot long phallic ovipositor to impale the woefully unprepared Elle through her designer jeans and right in her tight little pooper, the girl shrieking as the inch wide member slid between her thick brown cheeks and forced its way into her clenched virgin bowels, the girl grinding her teeth and kicking her feet franticly as inch after inch after inch of slimy alien dick crammed its way deep into her ass until the alien's torso was pushing up against her plush cheeks, the whole process taking little over ten seconds.

"KELLY IT'S GOT ME!!! I'M IN THE CARGO BAY!" Elle screamed into her radio, making Kelly jump before the unflappable captain started rushing over to Elle's position. Meanwhile Elle, her round bottom fully sodomized, struggled to escape, but the Alien would have none of that, and it used it's sharp claw like hands to hold the girl's soft brown ass in place.

"Please! Stop it please!" Elle begged as the Futa alien laughed, before speaking in a demeaning, serpent like voice.

"Sorry human, but I am a queen of my species, and I need to lay my eggs, but first let me fill you with my special semen. I have so much to give you."

"No please!!!" Elle wailed as she felt a sudden gush of thick, cold slime enter her rectum, the bubbling cream stretching and filling every inch of Elle's bowels as the helpless girl kicked and fought to get free, all the while the Futa alien laughed cruelly as Elle's six-pack abs turned increasingly into a different kind of six pack, her tight brown skin distorted painfully as stretch marks started forming all over her rapidly expanding tummy. Reaching back and gripping the corners of the duct, Elle tried to pull herself free, but her belly was growing so large that she soon felt her mass push her wrists against the duct before fully filling the sides of the narrow shaft as the alien pumped more and more of its seed up her thick ass, Elle

eventually coughing up large globs of goo before outright vomiting.

"There, all done!" The alien said with a hiss as it rubbed what it could of Elle's huge, trapped belly, the girl unable to move her arms as they were pinned against the vent by her massive, swirling, grumbling tummy.

"I'm so fat now!" Elle cried as she coughed up more clear slime, the alien lovingly rubbing the exposed side of Elle's belly before speaking again.

"And now for the eggs." The futa whispered, making Elle frantically try to free herself before the alien hissed in pain as Kelly rushed into the room and fired a warning shot at the creature's back.

"Let her go!" Kelly ordered as the alien angrily turned around and pulled out of Elle's slick passage with a pop, causing an avalanche of cold, rich slime to spill out of the back of her jeans from her stuffed hole and run down her thick thighs before spilling into her boots, the creamy goo gushing out of her worked orifice so quickly that her boots became overfilled with cum.

"Stupid human! I need to lay my eggs!" It screamed as it charged Kelly, who fired numerous shots on maximum stun, Kelly amazed as it barely hurt the creature before setting her weapon to injure, one shot causing green blood to spill from the Futa's shoulder before it hissed angrily and threw

Kelly to the side before running out of the room. Always putting her crew first, Kelly rushed over to Elle, who was doing her best to push some of the gallons of thick, glue like semen out of her anus, but without eggs to turn it into lube, Elle was lucky to force any out at all after the initial load, her efforts now only causing moist bubbling farts.

"My butt, it filled my butt with alien semen!" Elle cried as her gut bubbled uneasily with the creamy fluid, Kelly quick to calm Elle down before coming up with a plan to free her.

"Okay Elle, I am going to grab your hands and pull, it might hurt, but without getting you to a colonoscopy machine I don't know how we are going to get al the goo out of your ass." Kelly said as she took hold of Elle's hands, whose wrist and arms were still pinned by her own distended tummy,

"Ready?"

"I guess so." Elle said weakly as Kelly started pulling with all her might, causing Elle great discomfort, but even when putting her feet on the wall and pulling with her body weight, Elle wouldn't budge.

"It's no good!" Elle moaned, "I need to get some of this slime out of me first."

"I think I have a solution, but you won't like it." Kelly said with hesitation as her eyes landed on a large industrial vacuum cleaner.

"What is your plan?" Elle asked as Kelly plugged in the machine and got the long suction tube ready, doing her best to lube it up with her own spit.

"I am going to suck out as much as I can with this shop vac, it might feel funny." Kelly warned Elle as she wasted no time lining the tube up and jamming it firmly up Elle's butt, making the girl yelp as Kelly forced it in a good few inches.

"Here goes nothing." Kelly said as she turned the machine on, immediately causing a high-pitched vocal reaction from Elle as she felt large, thick globs

of cum get sucked out of her rectum, the loud slurping sound of the goo traveling out of her ass making Kelly gag as she watched large lumps form in the vacuum cleaner's tube as Elle's tight tummy slowly got smaller until she was finally able to free herself, quickly pulling the tube out of her ass despite still having a rather large gut.

"Oh god that was really weird feeling." Elle moaned as her bowels shifted to adjust to the new space in her slightly less full ass, her tall boots squeaking against the floor as slime spilled over the sides with each step, her heaving belly making her stumble as she felt the dense slime wiggle between her toes, the packed girl taking a minute to catch her breath before speaking, "Lets get the rest out later, first lets go back to sick bay and make sure Olga and the others are okay."

"Good idea." Kelly said as the two rushed back to medical, only to discover Olga's weapon on the ground and claw and slime marks everywhere.

At least it left Lea and Haley alone, Elle said as the two searched the room, only to see nail marks leading to a dark air duct above them.

"I guess she tried to put up a fight, she could be anywhere on the ship." Elle said as the Captain nodded in agreement before speaking.

"Let's stick together and see if we can draw it out, I have an idea."

"Are you sure this is a good idea?" Elle whispers into her radio as she shivers naked and bound to a post in the ship's small airlock, her belly still swollen with cum enough to make her look nine months pregnant and her sore anus still releasing pained, shrill, wet farts, all the while a bell around her neck jingles loudly at the slightest of movement.

"I'm quite positive it is an idea." Kelly radios back as she hides in a small closet, leaving Haley and Lea to rest in the now barricaded medical office, "Just let me know when you see the creature and I will open the airlock, after that I will come get you."

"Okay, but why couldn't it be you?" Elle asks quietly as goose bumps cover her creamy brown skin, the only sound being her gentle breathing, the

occasionally ringing of the bell around her neck, and the slow drip of slime out of her packed poop chute.

"Because it was my idea and you already have cum in your ass, the alien will want to finish up with you, plus it already knows that I am dangerous since I hurt it."

"But you heard it talking too, what if it is super smart or something and it sees right through this plan of yours?"

"I don't know then, but this was the best idea I had okay, just sit there and try to look appetizing, shake your ass some too, and just stick to the script I wrote."

"Okay okay fine!" Elle radios back angrily before clearing her throat and speaking in a loud, monotone,

and poorly acted voice, "Oh no! My captain has betrayed me and left me for the alien! I sure hope it doesn't come and, geez really captain?"

"Yes really just read it!"

"I sure hope it doesn't come and cum in my ass, I would hate that." Elle says as she rolls her eyes at the poorly written dialogue.

"Jingle the bell some." Kelly advises her.

"I am jingling the bell, the plan isn't working."

"Just give it time."

"What if it shows up and gets you first, we should stick together and kill it as a team."

"That is what we are doing, you saw how our weapons barely hurt it."

"Easy for you to say, your ass isn't on the line, mean while mine is literally on the line. My ass is literally about to be destroyed and you are hiding in a closet.

"Just calm down Elle and read the script again, but louder this time and with more bravado."

"Okay fine I will, but I just want you to know that...." Elle shouted before quickly lowering her voice, "Kelly I hear something, something above me."

"Just keep calm and let me know when it is in the room, no more communication until you need me to open the airlock."

"Okay, okay." Elle said as she kept one of her tied hands gripped on the radio as she looked around above her as she heard the echo of scraping in the vents above her, Elle's constantly turning head making the bell around her neck ring franticly as the sound got closer and closer until it was right above her, making Elle shake in fear until all of a sudden there was no more noise. Looking around, Elle took a deep breath of relief before the futa alien burst out of the vents above her with a massive belly ready to breed and quickly took hold of Elle's hips.

"Missed me?" The alien hissed as it immediately shoved its member up Elle's ass despite her frenzied flailing and kicking feet, the girl momentarily too frightened to radio back as she pissed herself before remembering the plan and calling Kelly.

"ITS HERE! OPEN THE HATCH!" Shee screamed as Kelly wasted no time pressing the button, causing the large air-lock doors to open and start sucking out everything in the room, but the futa alien wasn't going down easily, and it gripped onto Elle's hips as it slowly started to get pulled out of the wailing Asian girl's ass, it's claws leaving long painful scratches on her hips and thighs.

"Get out of me!!!" Elle squealed as all that was left in her was the head of the alien's member, which quickly formed a knot inside Elle's rectum until it was three inches wide.

"Never! If I go so does your asshole!!!" The alien hissed as it clung onto Elle for dear life, but Elle had no intention of having eggs laid in her, so despite what it would do to her anus, Elle managed to work her feet onto the alien's large and swollen gut.

"Say goodbye you ugly mother fucker!!!" Elle screamed in her best action hero voice before pushin the creature's large stomach away with her powerful legs, Elle moaning in agony as this caused the alien to inadvertently pump even more cold slime up her already full ass, making Elle's already massive gut swell even more as the girl refused to give up, and after taking a few more gallons of jizz up her ass, causing her belly to look to be pregnant with triplets, it happened. Letting out one more angry hiss, the alien popped out of Elle's ass, pulling her rectum out with it, and was finally sucked out of the airlock and into space, its member spraying sticky goo all over Elle and the room.

"Close the doors!!!" Elle screamed into her radio as Kelly quickly pushed the button, closing the doors in a second. Now even more filled with cum, Elle ran her hands over her hard and huge gut, tears rolling down her eyes as her devastated rectum tried its best to return to her body, but the recently added cum kept spilling out of her prolapsed anus for half a minute until the girl was in a pile of the sticky substance.

"Ohhh I knew this would happen!", Elle wailed as long jets of slime continued to spurt out of her colossally gaped rosebud is thundering, squelching farts.

"Are you okay Elle?" Kelly asked as she rushed into the room and untied the thoroughly sodomized girl, who quickly fell asleep in the large puddle of goo that had just been seconds before pumped up her ass.

"Well at least it's all over." Kelly said with a sigh as she carried Elle back to medical and laid her down,

"Rest okay." She told her three reamed and sleeping crew members before heading back to command the ship, but halfway there she heard staggering footsteps coming down the hall.

"Who's there?" Kelly asked before a figure with a gigantic, inhumanly large belly that dragged on the floor appeared.

"Olga is that you?" Kelly asked as she saw the Russian scientist with her makeup smeared and a trail of slime pouring out of her large bubble butt

behind her.

"I think it got me." Olga moaned weakly as her gut rumbled loudly and she leaned forward and let loose a powerful fart that caused a waterfall of slick, not sticky, slime to pour out of her stuffed backdoor, "I feel kinda funny Captain, ow my ass, my ass really hurts a lot. Ohhhh it's happening again!!!." She cried as she squeezed her mammoth belly which churned loudly before releasing another humongous load of slick slime on the floor behind her in a disgusting and booming fart as the dozens of eggs crammed inside her stretched bowls started to hatch.

Watching Olga expel copious amounts of slick slime in combination with her gigantic, pulsating belly, Kelly knew that she was about to lay a whole liter of anal raping aliens if she didn't act fast. Not willing to doom the arrogant women to death like the futa alien, she took the "good" doctor by the hand and dragged the blonde busty dame to the bathroom, the bloated girl barely able to fit through the door as she moaned in agony as slime continued to spray from her fat round ass profusely every few seconds.

"Here sit down on the toilet." Kelly instructed Olga, helping the girl plant her pale cheeks on the special straight to space waterless toilet, which consisted of small chamber capable of holding a few gallons of waste before needing to be opened to empty into the vacuum of space.

"Ohhh what's happening to me?! I feel like I'm going to explode!!!" Olga whined in her annoying high-pitched voice, the girl grunting in torment with long strands of bleach blonde hair in her face as contraction's raced through her body continuously, forcing out massive quantities of cum until she felt a sharp, intense pressure on her anus.

"Ow ow ow ow!!! Oh fuck oh fuck, my ass, something, Ohhh, something is in my ass, I can feel it moving in me!!!" Olga cried out as she braced herself on the toilet seat with a death grip while the pressure on her tight anal ring increased steadily, the pain growing more and more until her rosebud finally tore open and the first of many ass bursters exploded out of her crammed rectum, pulling her bleached anus inside out as the "baby" loudly hit the metal bottom of the chamber.

"FFUUCCKKK!!!" Olga wailed in anguish, as her miserably ripped backdoor spilled out even more slime until another alien was pushing against her, "No, please not again, please!!!" Olga begged in vein as her massive belly groaned ominously just before the girl gritted her teeth in unbearable pain as the second creature blow open her shitter even more, leaving it more wrecked than before.

Kelly could do little but try to support the steadily deflating girl as alien after anus destroying alien tore Olga a new asshole numerous times. After a half hour of torture Olga was nearly empty, but by now her once small rosebud was a limp, hanging, prolapsed, torn open and tremendously loose crater of its former self, some of the creatures simply falling out of Olga as her devastated orifice was too torn asunder to even put up an ounce of resistance. But even though Olga still had a small, but noticeable swollen tummy, the toilet was at full capacity due to the sheer volumes of slime and numerous critters waiting for Olga to move her ass out of the way. Not willing to take the risk of having one of the creatures escape, Kelly forced Olga to stay seated as she open the toilet to space, sucking out all the slime and creatures as well as almost sucking out Olga herself, sucking her demolished anus even further from her body, as well as pulling her fat bubble butt completely into the toilet itself, her large cheeks now firmly lodged inside the toilet bowl so the poor girl's knees were in her face. No doubt if Kelly didn't close the toilet any quicker the girl would have been sucked out to space through the toilet with them.

"You bitch! My ass is stuck in there!!!" Olga cried in a mixture of sorrow and mad fury as she tried desperately to dislodge herself from the toilet before the familiar bubbling in her bowels made the girl curl her toes as the last half dozen or so creatures finally left her body in a wet slurp.

"Oh I, I think I'm done, let them out so I can get up." Olga weakly asked as she felt the half dozen or so creatures in the toilet bowl start prodding her broken anus.

"I can't if I open the toilet again you will be sucked out into space, plus there is not way of getting you free without cutting you out, and that will have to wait until we get back to base in about a day." Kelly said in a sympathetic voice, "I will go get you some food and water."

"Wait you can't just leave me here!!!" Olga screamed in rage as one of the creatures, determining she is empty, shoved it's member up her ruined ass and started pumping more slime into her stretched tunnel,

"They are already fucking me again!"

"I'm sorry Dr. Chekov I really am, but look at the bright side, you did say a living specimen would make you a fortune, and now you will have a whole family of them, besides you can always just pay for more plastic surgery to fix your, well you know."

"No wait please!!!" Olga cried out as Kelly left the room and locked her in, leaving Olga to wallow in misery as she felt an egg slide up into her ruined ass.

The End?

Epilogue

"Its been a week since "the incident", as the upper brass is calling it, and the news of an anally raping group of aliens has shocked those on Earth. Though not shocking enough, apparently to stop several

"adult" film makers to already put in top bids to buy the rights to make a pornographic full length movie about it. Apparently they are going to call it "Analiens", a pun, for those who can't tell, of alien and anal; classy I know. I have already been awarded many medals for my ability to prevent any more of those monsters from getting to Earth, though I hardly feel like a hero, seeing how everyone under my command was hospitalized for the most intense rectal related damages seen since Taco Bell has been outlawed. I now am heading over to the hospital to see how everyone is recovering.

-Kelly Chambers

As the captain walked into the room where the four unfortunate girls lay recovering from their injuries, Kelly is reminded how lucky she is not to be laying there. Walking over to Lea Perez, the poor girl who had her anus horribly blown out when the first creature violently blasted out of her

rectum, Kelly see the girl laying on her tummy with her large round ass high in the air, numerous stitches and bandages a testament to the amount of surgery needed to repair her once virgin backdoor.

"How are you feeling Lea?" Kelly asked the girl who was still rather high on pain medications.

"Pre-tty good actually, I can't even feel my ass right now." She said with a slur as Kelly placed Lea's hand in hers and comforted the girl.

"I'm glad to hear, I understand you are going to make a full recovery, you must be pretty happy about that."

"Yessir I is, are, I am, HAhaha. I don't know if you know but you should know, I mean oughta know that I am super under the influence of drugs right now, so I guess I am pretty happy." Lea said with a large goofy smile before suddenly getting distracted by her long strands of black hair.

"Good, I am going to check on the others." Kelly said giving the girl one last pat on the back before walking over to Haley's bed. Unlike Lea, Haley's pooper was stuffed to the brim with slime and eggs, Kelly having to forcibly remove them from the uncooperative girl's pale little bottom one at a time.

"Hi Haley!" Kelly said with a smile, only to have the still angry girl turn her face defiantly away.

"What do you want?" She asked in a pouty voice, refusing to make eye contact with the captain.

"I just wanted to see how you were doing. I heard that you didn't even need surgery, just some muscle tighteners, you're very lucky."

"Am I?" Haley asked angrily as she finally made eye contact with the captain, "I first was anally raped and impregnated with huge eggs by some alien and then had them pulled out of my ass against my will while everyone watched, I don't see how I'm lucky."

"Well you could have ended up a lot worse, the others all needed surgery, and you know if I didn't then no doubt your, you know, would have been decimated."

"I guess..." Haley said as she starred off into the distance before looking back at Kelly, "But I know that, that isn't why I am mad, I am mad because, because..."

"Because why Haley?" Kelly asked softly as she leaned in closer.

"Because..." Haley said blushing before speaking in a whisper, "I really liked it when you were in my ass, I loved the pain and humiliation of it, and I don't know why. Does that make me weird?"

"UMMMMmmmmmmm.....Well I mean what is weird really, Yams are weird, but people seem to like them."

"Captain, I was wondering, when I get out, if you would want to, I don't know, maybe, and this is just a maybe feel free to say no, but I would really like it if you stuck your hand up my ass again, maybe on film even!"

"Well look at the time I have to go if I am going to see everyone before it gets dark."

"But its only 2."

"Okay their champ see you around!" Kelly said with a nervous laugh before awkwardly shuffling off to Elle's bed, the girl laying on her side as a young blonde nurse administers an enema to the girl, who still has a rather large gut.

"Captain! How are you?" Elle asks with a smile before grunting as her insides started to bloat with the warm saline mixture the nurse was giving her.

"I can come back if you want." Kelly said covering her eyes before Elle laughed and insisted she stay.

"It's okay captain, that slime hardened really quick without eggs, so after they fixed my anus to new they started the slow process of getting all the slime out, and let me tell you it is taking a while." Elle said in an upbeat voice as her gut was now quite swollen, the nurse behind her pulling the enema bag out and inserting a powerful suction tube inside her, making Elle gasp as a mixture of salt water and softened slime started to get sucked out of her fat ass.

"You sure seem to be in good spirits despite your ordeal." Kelly said somewhat uncomfortably, surprised

by how well Elle was taking non-stop enemas and suctions both mentally and physically, "It must be hard to be so brave."

"I suppose so, but being all negative about it won't change anything. Haley over there has been moody the whole time since she got back, did she tell you anything?"

"No, umm not at all, she is just embarrassed that I had to remove the eggs with everyone watching."

"Yeah it was weird, the whole time you were pulling eggs out of her she kept looking at me with these big eyes, almost like she was enjoying it, but that would be crazy won't it?" Elle laughed as her gut had emptied back down to a slightly smaller size than before, the nurse having to start the process over again as Elle started to bloat with another enema.

"That would sure be crazy and not what happened at all, anyway you are busy and I still have to see Olga, stay strong Elle."

"Ooohhh, careful!" Elle said looking back at the cute nurse before turning to Kelly, "Okay Captain, see you when I get out of here in a few more days."

Walking over to Olga's bed, Kelly stood in front of the sheets that has been hiding her the whole time due to the extent of her devastating injuries. By the time that the ship got back to base Olga had been fully re-impregnated and had to be taken away by a special Hazmat crew, who had to cut her out

of the toilet and staple her gigantically gaped hole shut until they were able to take her somewhere to safely remove the aliens in her. Taking a deep breath, Kelly pulled the curtains and stepped inside, fully taking away by what she saw.

"Dr. Chekov!!! You're..."

"Perfectly fine? Yeah I know!" Olga said as she sat on her bed reading a large pamphlet of stapled papers.

"But your ass, it was-"

"Destroyed? Yeah I know, I got a full anus transplant, now my ass is even tighter than before. Thank goodness I was right about how much money those critters were worth." Olga said with a smile as she went back to her papers.

"What's that?" Kelly asked before Olga handed her the whole packet.

"Its the script for the porno they are making based off of our experiences! I am writing and staring in it, exciting isn't it?" Olga asked before snatching it back, "We are even using a real alien to rape and impregnate me on film, I am going to make a fortune!!!"

"You can't be serious!" Kelly said in shock, "They will destroy your ass again."

"So what?" Olga said with a shrug, "I can just buy a new one. I always knew there was more to life than science, I really think I found my calling."

"Yeah it looks that way." Kelly said exacerbated, taking a moment to catch her breath and turn to leave,

"I think Elle might be interested in being in the movie by the way, see you around I guess."

"Really!!! That's great! Thanks Captain, I always knew you were okay! Bye now." Olga said without looking up from her masterpiece of a script. Taking one last look at Olga, Kelly left that room in disgust.

"What kind of weirdo wants to watch a film about girls being anally raped, impregnated, and then having them explode out of their ass? Something ain't right with them."

THE END

Thanks Weirdos For Jerking Off to My Highly Disturbing Story!!!
